

## **Treated Wood**

Following are examples of treated wood:

- Creosote, pentachlorophenol, CCA (chromated copper arsenate or green treat), ACQ (alkaline copper quat), CA (copper azole), copper naphthanate, disodium octaborate tetrahydrate, propiconazole tebuconazole imidacloprid, micronized copper azole.

### *Disposal*

- Treated wood will be transported to a MnDOT approved landfill. TREATED WOOD MUST NOT BE DISPOSED AT A DEMOLITION LANDFILL. Some landfills have a more stringent acceptance policy and may not accept some types of treated wood.
